Project Design Phase
Solution Architecture

Date	16/02/2026
Team ID	69a7fb1de8fb1cec7726dd56
Project Name	Contact Manager
Maximum Marks	4 Marks

Solution Architecture:

The solution architecture for the Contact Manager application a scalable, efficient, and user-friendly platform for storing, updating and searching the saved contacts or adding new ones.

Goals of the Solution Architecture:

Identify the Best Tech Solution:

- Utilize modern backend frameworks like Node and Express to provide fast responses and efficient development

Define Structure & Characteristics:

- Ensure a modular, scalable, and maintainable software architecture that supports future feature enhancements like bulk deletion, bulk addition of contacts

Outline Features & Development Phases:

- Clearly define project milestones, including schema creation, data base queries and api development

Establish Specifications for Development & Delivery:

- Provide well-defined guidelines for system architecture, API development, data flow, and real-time data handling.
